AICTE - VAANI 2026-27

Vibrant Advocacy for Advancement and Nurturing of Indian Languages

2-DAY INTERNATIONAL CONFERENCE | GUJARATI / ENGLISH | OFFLINE / HYBRID

Tech4Sustain 2026

Technology Driven Pathways to Sustainable Growth

Technology for Sustainable Development through Regional-Language Academic Communication

CONFERENCE THEME

Energy, Sustainability & Climate Change

Research Paper Submission Guidelines

19-20 December 2026

Multimedia Hall, Dharmsinh Desai University, Nadiad, Gujarat, India

**ZERO REGISTRATION FEE | PEER-REVIEWED ISBN
PROCEEDINGS**

Invitation for Research Paper Submission

Researchers, academicians, faculty members, research scholars, undergraduate and postgraduate students, industry professionals, start-up innovators and practitioners are invited to submit **original, high-quality research papers, review articles and practical implementations** relevant to the theme and technical tracks of **Tech4Sustain 2026**.

The conference encourages research contributing to sustainability through emerging technologies, interdisciplinary innovation and regional-language academic communication.

1 General Guidelines

- The submitted research paper must be **original and unpublished work**.
- The manuscript should be relevant to the conference theme: **“Energy, Sustainability & Climate Change.”**
- Papers should address one or more announced technical tracks or interdisciplinary areas of Tech4Sustain 2026.
- The paper should clearly present the research problem, objectives, methodology, results/findings, discussion and conclusions, wherever applicable.
- Research papers already published or under consideration for publication elsewhere should not be submitted.
- The conference is organised in **bilingual Gujarati/English mode**. Authors should prepare their work in accordance with the bilingual/regional-language objectives of the AICTE-VAANI scheme and conference requirements.
- Authors are responsible for the accuracy, originality, authenticity and ethical integrity of submitted content.
- All sources, datasets, figures, tables, algorithms, methods and previously published works referred to in the manuscript must be appropriately acknowledged and cited.
- Plagiarism, fabrication, falsification and other forms of academic misconduct are strictly prohibited.
- Authors must obtain all necessary permissions before reproducing copyrighted material.

2 Technical Tracks

2.1 Artificial Intelligence, Machine Learning & Data Analytics

AI/ML; Deep Learning; Generative AI and LLMs; AI Agents; Computer Vision; NLP; Predictive and Prescriptive Analytics; Big Data; Edge AI and TinyML; Explainable and Responsible AI; AI for Healthcare, Engineering, Business and Society; Digital Twins; Scientific Machine Learning.

2.2 IoT, Embedded Systems & Smart Infrastructure

Internet of Things; Industrial IoT; Embedded Systems; Edge/Fog Computing; Smart Healthcare; Smart Agriculture; Smart Buildings; Smart Manufacturing; Sensors and MEMS; Energy Harvesting; Connected Devices; IoT Security; Remote and Rural Applications.

2.3 Sustainable Technologies, Energy & Environment

Renewable Energy; Energy Storage; Electric Vehicles; Wireless EV Charging; Smart Grids and Microgrids; Hydrogen and Fuel Cells; Energy Management; Green Manufacturing; Waste and E-Waste Management; Water and Wastewater; Environmental Monitoring; Carbon Management; Climate-Resilient Engineering; Green Chemistry.

2.4 Communication Systems, Signal Processing & Networks

5G/6G; Wireless Communication; Massive MIMO; mmWave/THz; Integrated Sensing and Communication; Satellite and Space Communication; Optical/Free-Space Communication; SDR/Cognitive Radio; Digital Signal Processing; Biomedical Signal Processing; Speech and Audio; Wireless Sensor Networks; Vehicular/Drone Networks; AI for Communications; Network Security.

2.5 Industry 4.0/5.0, Automation & Digital Manufacturing

Smart Factories; Cyber-Physical Production; Industrial Automation; PLC/SCADA; Robotics; Collaborative Robots; Autonomous Systems; Digital Twins; Predictive Maintenance; Additive Manufacturing and 3D Printing; Smart Quality; Industrial AI; Human-Machine Interaction; AR/VR; Smart Supply Chains; Human-Centric Industry 5.0.

2.6 Smart Cities, Mobility & Cyber-Physical Systems

Smart Infrastructure; Urban IoT; Intelligent Transportation Systems; Electric and Autonomous Mobility; Connected Vehicles and V2X; Smart Public Transport; Smart Parking; Cyber-Physical Systems; Smart Buildings; Smart Water and Waste; GIS and Geospatial Intelligence; Urban Disaster Management; Digital Twins for Cities; Smart Governance; Digital Public Infrastructure.

2.7 Semiconductor, VLSI & Emerging Electronics

VLSI; ASIC/FPGA; RISC-V; AI/ML Hardware; AI Accelerators; Semiconductor Fabrication and IC Prototyping; MEMS; Advanced Packaging; Chiplets; 2.5D/3D Integration; Power Electronics; SiC/GaN; Emerging Memories; In-Memory Computing; Flexible/Wearable Electronics; RF/Microwave ICs; Semiconductor Testing and Reliability; Chip Security.

2.8 Interdisciplinary Innovations Aligned with ATAL Priorities

Deep-Tech Innovation; Healthcare Technology; AgriTech; Climate and Environmental Technology; Disaster Management; Assistive and Inclusive Technology; Defence and Strategic Technologies; Space and Aerospace; Advanced Materials; Robotics and Autonomous Systems; Cybersecurity; Digital Public Infrastructure; Technology Entrepreneurship; Frugal and Affordable Innovation; Human-Centric Technology; EdTech.

Interdisciplinary papers falling within the overall conference theme are also encouraged.

3 Structure of the Research Paper

3.1 Title of the Research Paper

The title should be concise and informative, clearly related to the research work, **Times New Roman, 16 pt, bold and centred**.

3.2 Author Details

Immediately below the title, provide:

- Full name of author(s)
- Designation
- Department and Institution/Organisation
- City, State and Country
- Email ID of the corresponding author

The corresponding author should be clearly identified.

3.3 Abstract

The abstract should provide a concise overview of the complete research paper and should preferably include the research background/problem, motivation, objectives, methodology, dataset/sample/experimental setup where applicable, major findings/results and principal conclusion.

Recommended abstract length: 200–300 words.

3.4 Keywords

Authors should provide suitable keywords immediately after the abstract. Keywords should represent the core subject of the manuscript, include important technical terms and facilitate indexing and identification of the research area.

3.5 Introduction

The introduction should establish the background of the research problem, context, significance, research problem, motivation, scope and relevance to sustainability/emerging technology wherever applicable.

3.6 Literature Review / Related Work

Discuss relevant previous research, important theories, technologies, models, frameworks or approaches; compare existing methods; identify limitations or gaps; establish the need for the present study; and include recent and relevant research publications wherever possible.

3.7 Research Gap / Problem Statement

Clearly identify limitations of existing research, unresolved issues, technological or methodological gaps, practical challenges and the specific problem addressed by the proposed study.

3.8 Objectives of the Study

Objectives should be specific, clear, measurable wherever applicable, relevant to the research problem and achievable through the proposed methodology.

3.9 Research Methodology

Depending on the nature of the study, include appropriate details regarding research design, dataset/sample, data sources and collection methods, study area, variables/parameters, hardware/software tools, sensors/instruments, technologies, algorithms/models, mathematical formulation, experimental setup, simulation environment, statistical techniques, training/testing procedure, evaluation metrics, proposed architecture/framework and implementation procedure.

3.10 Results and Findings

Present the major results clearly and systematically. Where applicable, include experimental or simulation results, statistical analysis, performance metrics, comparative analysis, tables, graphs, charts, figures, confusion matrices, performance curves, error analysis and validation results.

3.11 Discussion

Interpret the findings and explain their significance, including comparison with previous studies, advantages of the proposed methodology, practical and academic implications, sustainability implications, industrial or societal relevance, and limitations of the study.

3.12 Conclusion

Summarise the major findings, main contribution, significance, achievement of research objectives, important practical or theoretical outcomes and key takeaways.

3.13 Future Scope / Recommendations

Where applicable, mention possible extensions, improvements, further investigation, large-scale implementation opportunities, practical recommendations, industrial or societal applications, and potential sustainability impact.

3.14 Acknowledgement

Authors may acknowledge funding agencies, institutions, laboratories, research centres, industry partners, technical contributors and individuals who assisted the research but do not qualify for authorship. Funding support should be appropriately acknowledged.

3.15 References

All references must be properly cited in the manuscript, listed at the end, prepared in **APA Style**, arranged alphabetically by the surname of the first author, and contain complete bibliographic information.

4 Formatting Guidelines

Element	Requirement
Paper Size	A4
Margins	2.54 cm on all four sides
Font	Times New Roman
Paper Title	16 pt, Bold, Centred
Main Headings	14 pt, Bold, Left aligned
Sub-headings	12 pt, Bold
Main Text	12 pt
Line Spacing	1.5
Text Alignment	Justified
References	APA Style
Language	British English / Gujarati as applicable to bilingual conference requirements

Authors should maintain uniform formatting throughout the manuscript.

5 Tables

- All tables should be centred and appropriately formatted.
- Tables should be numbered consecutively using Arabic numerals.
- Each table must have a title above the table.
- The title should clearly describe the contents.
- The source should be provided below the table wherever applicable.
- The same formatting should be maintained throughout the paper.
- Tables should be referred to in the main text.

Example: Table 1. Performance Comparison of Proposed Models

Source: Authors' compilation / appropriate source.

6 Figures, Graphs, Charts and Diagrams

- All figures, photographs, graphs, charts and diagrams should be centred.
- Figures should be numbered consecutively.
- Each figure should have an appropriate caption.

- Figures should be sufficiently clear, sharp and readable.
- Text within figures must remain legible in the final paper.
- The source should be mentioned wherever applicable.
- All figures must be referred to in the main text.

Example: Figure 1. Proposed Technology-Driven Sustainable Framework

Source: Authors' work.

7 Equations and Symbols

- Mathematical equations should be clearly presented.
- Important equations should be numbered where necessary.
- All symbols, abbreviations and variables should be defined when first introduced.
- Consistent notation should be maintained throughout the manuscript.
- Equations should remain clearly readable in the final manuscript.

8 Research Ethics and Originality

By submitting the manuscript, authors are expected to ensure that:

- The research represents the original work of the author(s).
- All sources and previous works are properly acknowledged.
- Research data, results and findings are presented honestly.
- No fabricated, falsified, manipulated or misleading results are included.
- Appropriate permission is obtained wherever copyrighted material is used.
- Personal or confidential information is not disclosed without appropriate permission.
- All listed authors have made appropriate contributions to the work.
- The manuscript complies with applicable standards of academic and research integrity.

9 Plagiarism Policy

- All submitted papers may be subjected to plagiarism/similarity screening.
- The **similarity/plagiarism level should be less than 10%**.
- Papers exceeding the permissible level may be returned for revision.
- Papers with substantial plagiarism or serious academic misconduct may be rejected.
- Authors must ensure proper citation and referencing of all borrowed ideas, text, data, figures, tables, algorithms, methodologies and other intellectual material.

10 Paper Length

The recommended length of the complete research paper is **5–8 pages**, including title and author details, abstract, main manuscript, tables, figures, equations, acknowledgements and references. Papers may be slightly shorter or longer depending on the nature and contribution of the research, subject to the decision of the Conference Review Committee.

11 Review and Acceptance

Submitted manuscripts will be considered for review based on:

- Relevance to the conference theme
- Originality and technical quality
- Research methodology and quality of analysis
- Significance of findings
- Practical relevance and contribution to sustainability
- Clarity of presentation
- Academic integrity
- Compliance with submission guidelines

Authors may be requested to revise manuscripts based on reviewers' observations before final acceptance. The decision of the Conference Review Committee shall be final.

12 Publication

Papers presented during **Tech4Sustain 2026** will be published in **conference proceedings with ISBN Number**. Authors must complete all required registration, camera-ready submission and presentation requirements for inclusion in the proceedings.

13 Paper Submission Modes

Authors may submit their manuscript through either of the following modes.

Mode 1 - Online Submission through Google Form

Fill in the required author details and upload the manuscript at:

<https://forms.gle/sdonu8A6ny4c4op49>

Mode 2 - Direct Email Submission

Submit the manuscript in **DOCX or PDF** format to:

tech4sustain@ddu.ac.in

Required email subject:

Tech4Sustain 2026 Paper - [Track Name] - [Author Name]

14 Important Dates

Activity	Date
Call for Papers	05 September 2026
Last Date for Paper Submission	25 October 2026
Acceptance Notification	09 November 2026
Registration & Camera-Ready Paper Submission	25 November 2026
International Conference - Tech4Sustain 2026	19–20 December 2026

15 Registration

ZERO REGISTRATION FEE - Fully funded under the AICTE-VAANI Scheme 2026–27

All authors of selected papers MUST register on the AICTE ATAL Portal.

Mandatory ATAL Registration Steps

1. Visit the AICTE ATAL Academy portal: <https://atalacademy.aicte.gov.in/login>
2. Log in / complete participant registration.
3. Select the relevant Conference.
4. Enter the **VAANI Application Number: 2806237563**.
5. Complete the required registration procedure.

Only registered participants/presenters will be eligible for official Participation and Presentation Certificates, as applicable.

16 Presentation Requirement

Accepted papers should be presented during the conference in accordance with the scheduled technical sessions. Tech4Sustain 2026 is organised in **Bilingual Mode - Gujarati/English**. Authors/presenters should comply with bilingual presentation requirements communicated by the organising committee. Presentation schedules and detailed instructions will be communicated to accepted authors separately.

17 Camera-Ready Submission

Authors of accepted papers must submit the final camera-ready manuscript on or before **25 November 2026**. Before submission, authors should ensure that:

- All reviewers' comments have been appropriately addressed.
- Author names and affiliations are correct.
- Tables and figures are clearly readable.
- References are complete and consistently formatted.
- Language and grammar have been carefully checked.
- The manuscript complies with the prescribed formatting guidelines.
- Similarity/plagiarism requirements have been satisfied.
- The final manuscript is ready for publication in the conference proceedings.

18 Author Checklist Before Submission

- ☐ Paper is original and unpublished.
- ☐ Paper falls within the theme/scope of Tech4Sustain 2026.
- ☐ Correct technical track has been selected.
- ☐ Title accurately represents the research.
- ☐ Complete author names and affiliations are provided.
- ☐ Corresponding author's email address is included.
- ☐ Abstract is approximately 200–300 words.
- ☐ Suitable keywords are included.
- ☐ Research problem and gap are clearly stated.
- ☐ Objectives are clearly defined.
- ☐ Research methodology is adequately explained.
- ☐ Results are clearly presented and discussed.
- ☐ Conclusion is supported by the findings.
- ☐ Tables and figures are properly numbered and referenced.
- ☐ Equations and symbols are clearly defined.
- ☐ References follow APA style.
- ☐ All borrowed material has been properly cited.
- ☐ Similarity/plagiarism level is below the specified limit.
- ☐ Paper length is approximately 5–8 pages.

- ☐ Manuscript follows the prescribed formatting requirements.
- ☐ Final file has been checked for grammar and typographical errors.
- ☐ DOCX/PDF file opens correctly.
- ☐ Correct submission mode has been used.
- ☐ Correct track name and author name are mentioned in the email subject when email submission is used.
